ROHAN KOKA

Oakdale, PA 15071 | 412-583-6527 | rohandkoka2020@gmail.com | github.com/rohan-koka

EDUCATION

University of Pittsburgh *Expected May 2029*

B.S., Information Science — Cybersecurity Pathway, School of Computing and Information | Pittsburgh, PA

- Relevant Coursework: Networking Fundamentals, Cybersecurity Principles, Programming Concepts, Data Analytics
- Accomplishments: Dean's List, Perfect Attendance

TECHNICAL SKILLS

Languages: Python, JavaScript **Tools & Libraries:** Streamlit, Pillow, NumPy, dnspython, Git & GitHub, Visual Studio Code

Technical Knowledge: Cybersecurity fundamentals, cryptography, networking (TCP/IP, DNS, IP geolocation), LSB steganography, phishing detection, computer hardware

PROJECTS

Steganography Tool *2026*

Python · Streamlit · Pillow · NumPy

- Built a web app that hides and extracts secret messages inside PNG images using Least Significant Bit (LSB) steganography
- Implemented encode/decode modes with downloadable output, applying data concealment concepts from cybersecurity coursework

Phishing URL Detector *2026*

Python · Streamlit

- Developed a URL analysis tool that flags phishing indicators including suspicious TLDs, IP-based domains, encoded characters, and risky keywords
- Generates a risk score and full URL breakdown, applying real-world threat detection logic used in security tooling

IP Address Lookup Tool *2026*

Python · Streamlit · ip-api.com

- Built a web app that retrieves geographic and network data (country, ISP, timezone, city) for any public IP address
- Integrated an interactive map to visually pinpoint IP location, demonstrating applied networking and API integration skills

Caesar Cipher Encoder/Decoder *2026*

Python · Streamlit

- Built an interactive cryptography tool that encrypts and decrypts text using Caesar Cipher with an adjustable 1–25 shift value
- Included real-time letter shift visualization and toggle between Encode/Decode modes, reinforcing applied cryptography concepts

EXPERIENCE

Carhop — Sonic Drive-In *2024 – 2025*

Oakdale, PA | ~20 hours/week

- Interacted with 200+ customers per shift in a fast-paced environment, strengthening communication and time management skills
- Maintained accuracy and efficiency under pressure while managing multiple orders simultaneously

Programming Intern → Student Leader — STEM-E Online Internship *Grades 9–11*

Remote | ~5 hours/week

- Joined a 500+ member STEM internship; earned a leadership role mentoring beginner programmers in game development
- Received a formal letter of recommendation from internship coordinator for performance and initiative

ACTIVITIES & LEADERSHIP

Engineering Club / Student Government — Penn State Beaver *Fall 2025*

- Participated in technical problem-solving discussions; engaged in student representation and campus involvement initiatives
